

STACKED PODIUM

JDS ARCHITECTS ON THE DESIGN "How to be specific and generic altogether? Shelving systems have a tendency to achieve one concern but never both. We decided to dimension shelving units based on the generic measurements of things to store and display while allowing for them to be combined according to specific needs and desires. The result can be at times a random stack of boxes or a coordinated grid of efficient storage ... or both!"

ABOUT THE DESIGNER

Copenhagen-based Julien De Smedt is the co-founder of Plot and an internationally acclaimed architect. He is recognized for his ability to always take a fresh look at things. His works challenge conventions and many have been awarded. At only 29 years old he won the Golden Lion for world's best concert hall at the Venice Biennale.

CATEGORY

Podium for Stacked Shelf System

ENVIRONMENT

Indoor / Free standing or wall mounted

COUNTRY OF PRODUCTION

Slovenia

PREASSEMBLED

Yes

DESCRIPTION

A base/podium for the Stacked shelving system, to lift the Stacked boxes up from the floor.

PRODUCTION PROCESS

White, light grey and dark grey podiums: Every side is cut out of MDF, assembled, glued together and painted with 3 layer of PU lacquer. Ash: Every side is cut out of MDF with ash veneer on top, then assembled and glued together.

MATERIAL

PU lacquered MDF or oak veneer

CLEANING AND CARE

Remove dust from shelves with a soft cloth. When necessary clean with moist cloth. For wood veneer finishes, dry immediately with a soft cloth following wood grains. The wood should not be exposed to excessive heat, direct sunlight or humidity.

WEIGHT & HEIGHT LIMITS

Max. 300 kg when evenly distributed on the shelf system.
